Two separate case studies are developed, helping readers understand how the development and implementation of information security strategies can work within their own organizations. This is essential reading for information security managers, information technology executives, and consultants. By linking information security to general management strategy, the publication is also recommended for nontechnical executives who need to protect the value and security of their organization's information. About the Author **VINCENT LeVEQUE** is a Senior Security Engineer for a large systems integrator and technology consulting firm, and previously worked for a large public accounting firm in their information risk management practice. He has more than fifteen years' experience in information technology, with an emphasis on information security solutions. His client base has included public utilities, local government, financial institutions, health care, telecommunications, retail, and manufacturers.
